

SHIFAS PS

Thrissur, Kerala

+91 7012918968 — shifasshamsu2003@gmail.com — LinkedIn — Github

Professional Summary

Motivated Artificial Intelligence and Data Science graduate with hands-on experience in Python, SQL, backend development, and machine learning concepts. Skilled in developing automation systems and working with structured datasets using Pandas, NumPy, and Django. Passionate about building real-world software solutions, AI-powered applications, and continuously learning emerging technologies.

Education

B.Tech in Artificial Intelligence and Data Science

APJ Abdul Kalam Technological University, Kerala

Currently Pursuing

Higher Secondary Education (Class XII)

Kerala State Board

2022

Score: 82%

Secondary Education (Class X)

Kerala State Board

2020

Score: 88%

Technical Skills

- **Programming Languages:** Python, SQL, HTML, CSS
- **Frameworks & Libraries:** Django, TensorFlow, Scikit-Learn, Pandas, NumPy, Matplotlib
- **Core Areas:** Backend Development, Machine Learning, Data Analysis, Full Stack Development
- **Tools:** Excel, Database Management, Data Visualization

Projects

AI Task Management System with Chatbot Integration

- Developed a full-stack AI-powered task management system using React and Django REST Framework.
- Implemented JWT authentication with role-based dashboards for Admin, Manager, and Intern users.
- Built project and task management modules with CRUD operations, task assignment, deadlines, and real-time task updates using WebSockets and Django Channels.
- Designed analytics dashboards with task completion charts and workload distribution using Chart.js.
- Integrated an AI chatbot with streaming responses, contextual awareness, chat history storage, PDF export, and dark/light mode support.
- Used technologies including React, Django REST Framework, Django Channels, WebSockets, Chart.js, Bootstrap, and OpenRouter AI API.

Smart AI Autonomous Robot

- Developing an AI-powered autonomous robotic system using machine learning for intelligent decision-making and automation.
- Integrating sensors and automation logic for smart real-time responses.

Multi-Branch Inventory Management System

- Designed a centralized inventory management system for handling stock tracking across multiple branches.
- Implemented database-driven architecture for reporting and inventory control.

Pay on Purchase System

- Developed a backend automation system for purchase and billing workflows using Python and SQL.
- Implemented database connectivity, transaction handling, and structured data management.

Achievements

- Participated in the state-level cyber security event “Shadow Login”.
- Successfully completed the AI Skills Passport Program by EY & Microsoft.
- Working on real-world AI and automation projects.
